Tangyes Oil Engine.—Extract from Report by W. C. Kernot, Esq., Professor of
Engineering, Melbourne University, 27-6-96:—

Simple design and ample strength . . . efficient governor . . . good
workmanship, such as is usually seen in Tangyes Limited Machinery . . . Oil consump-
tion 688 pint per I.H.P. per hour . . . Results highly satisfactory . . . indicated
and brake horse-power fully 25 per cent. more than given in maker's catalogue . . . As
regards *Simply*, strength, and absence of small complicated parts, it appears to have the
advantage over its competitors.

Several of these Engines are now running in this Colony and are giving satisfaction.
