BA1343/19	/30	Derek Keene	Visit to Halls Creek by the Governor of Western Australia.	In April the new Governor of Western Australia, Lieutenant General John Sanderson and Mrs Sanderson visited Halls Creek for the first time. The Governor was interested in seeing the remains of old Halls Creek, so it was arranged that local historian Derek Keene would show the Governor and Mrs Sanderson around the old townsite. The old post office building is all that is left of this once great gold mining town, and that too is under pressure from weather exposure. The Governor and his wife spent some time examining the site. Forever an historian, I asked the Governor and Mrs Sanderson if I could take a photo of them standing by the fireplace and they were only to [sic]	2001

BA1343/19	/110	Derek Keene	<p>In April, a triple trailer roadtrain ran off the Great Northern Highway in the early hours of a Sunday morning. It was estimated the roadtrain left the road at over 100 kph when the driver fell asleep at the wheel. The accident happened 30 kilometres west of Halls Creek. The two drivers both suffered injuries and were taken to the hospital and later flown to Derby by the Royal Flying Doctor. I went out to the accident site with Malcolm Edwards who assisted in the recovery of the trailers and prime mover. A large crane was hired from one of the mine sites near Fitzroy Crossing to load the damaged prime mover and trailers. The prime mover was severely damaged after hitting a gully, just seconds after leaving the road. The cost of repairing the prime mover was \$120,000.
